# Welcome

Welcome to the **Lodestone Catalog** -- the world's best source for English-language contemporary audio theater.

## Why Audio Theater?

We sell audio theater because we love the medium of audio theater. It's that simple.

Audio Theater is the theater of the mind. It sparks the imagination, allowing you, the listener, to create his or her own mental images.

Our friends at XM Sonic Theater are fond of telling you, "The pictures are in your head."

Our friend, Norman Corwin, tells of a story of a young girl who was asked if she preferred Radio or Television. She said 'Radio'. When asked why, she replied, "Because the pictures are better."

These two ideas, taken together, only confirm what we already knew:

*The pictures are **better** in your head.*

## Why Contemporary Audio Theater?

Of course, we love the old stuff. "Old-Time Radio" (OTR) is a wonderful thing. It was a time when a great deal of time, effort, and money was put into the medium, and it got some wonderful results.

And the best of those results got remembered. The best of those results got preserved. The best of those results is still around today.

What we listen to today is the best of what was created then.

But what about the new stuff?

Although television and trends took audio drama largely off the radio since the 1950's, it has evolved into an artists medium, created by people who love the medium and use great skill, time, love, and patience to produce audio theater which reaches beyond the styles and conventions of OTR. Audio theater is a growing and evolving art form, the best of which engages the mind and excites the imagination.

## Why Lodestone Catalog?

But how do you find the best of the new stuff?

That's where we come in. We present the best in contemporary audio theater. The cream that rises to the top. We carry the stuff that turns us on. We think it will turn you on, too.

## What's In A Name?

Why do we call it audio theater? Many people call it radio drama, but most of the best new productions go directly to CD, never being heard on the radio. New-Time-Radio? Same problem. Theater of the Mind? Theater of the Ear? Sonic Movies? All nice, and great at capturing different aspects of the medium, but we think Audio Theater describes it best.

## What is Audio Theater?

Voices. Music. Sound effects. Silence. These are the basic ingredients of audio theater.

But there are more ingredients -- Time, Craftsmanship, Intelligence, Love, Imagination. Toss in heavy helpings of great scriptwriting, and a whole lot of good acting.

Audio Theater starts with the written word, but it is much more than just reading aloud.

Audio Theater fires the imagination and stirs the soul.

Audio Theater makes you laugh, cry, hope, and dream.

And we are happy to bring some of the best audio theater to you.
